About the Company

AAC SYSTEM SDN BHD (AAC) Company No. 644366-D, formerly known as Alfa Advanced Computer(Company No. JM0260881) was established in 1997 to venture into the competitive and challenging world of computers. Our mission is to be the most successful solution provider in local market and delivering the best customer service in market we serve.

Coming in the following year, the company aims to produce a greater satisfaction and higher quality in all products and services to our loyal customers that carries AAC's products. AAC will continue to satisfy the needs of various types of customers by offering customer-oriented computer and IT products and services, so as to realize its aspiration of becoming "a technology driven, service oriented, and nationwide AAC".

We aims to markets, services and supports a full range of personal computer systems from notebooks to networks, and Internet base products. Our Key products include the business workstation, servers, Multimedia Personal Computer series, mobile PCs, modem, TMnet products, scanners, photo printers, networking and imaging products.

With customers ranging from Commercial companies, government agencies, educational institutions, small businesses and individuals, our goal has always been to help customers' build their future. Since we commenced operations, our customer base has unfolded many successes. This success, apart from customers' support and trust in

our reliable products, is attributable to our resources, services and reliability that we place high regard to.

We provide Technical Support at service hot lines, available to customers for the life of their AAC systems. Here, our engineers resolve most of the customer questions over the telephone. However, if further service is requested, our On-Site services will follow with a technician arriving at your location to immediately rectify it. When the need arise, we will also send a van to your location to collect the faulty units, and to return the repaired units thereafter.

OBJECTIVES

- To be a Dynamic IT products Trading Company
- To provide Excellent product and after sales service and support
- To maintain leading technology and highest quality
- Lead Malaysia to the new technology world

Fourfold Mission

For customers

To streamline our customers' living and working conditions by providing them with the latest and best in IT products and services;

For staff

To provide a stimulating and challenging working environment in which employees can find multiple opportunities for personal and professional advancement;

For the community

To contribute responsibly to the development of the wider community.

For shareholders

To maximize our shareholders' long-term benefits;

Corporate Culture

Our Four Core Values

1) Serving Customers

Serving customers defines value enhancement; this principle is a DNA that imprints in every AAC employee's genes.

2) Accuracy and Truth Seeking

Conclusion is based on facts and scientific analysis; the respect for rules and guidelines; have discipline and courage to face up to reality and take responsibility.

3) Trustworthy and Integrity

Trustworthy and integrity is AAC's "golden marquee", a vital business philosophy.

4) Innovative and Can Do Spirit

Ownership mentality, be proactive and humble, with strong sense of urgency and can do; change ready.
