

MS Exchange Server

Realttime share your MS Outlook information

Why using MS Exchange Server ?

Realttime two way communication with access control and security for Mail box, Task, Calendar, Contact, Notes and Journal in MS Outlook.

If you familiar with MS Outlook, when you key in something in Task or Notes, other clients can look and read what you key in immediately!

What is MS Exchange Server ?

Exchange Server, the Microsoft messaging and collaboration server, is software that runs on servers that enables you to send and receive electronic mail and other forms of interactive communication through computer networks. Designed to interoperate with a software client application such as Microsoft Outlook, Exchange Server also interoperates with Outlook Express and other e-mail client applications.
