

MS ISA(Proxy) Server

Manage and monitor ALL your Internal Internet Access

ISA = Internet Security and Acceleration

Why using MS ISA Server ?

Manage and monitor the Internet usage within your network.

ISA Server can also be used to filter requests. For example, a company might use a ISA/proxy server to prevent its employees from accessing a specific set of Web sites.

Powerful reports or logs for Internet usage.

With VPN technology, can manage and monitor Internet usage for ALL branches over the world!

What is Proxy Server ?

A server that sits between a client application, such as a Web browser, and a real server. It intercepts all requests to the real server to see if it can fulfill the requests itself. If not, it forwards the request to the real server.
