

File Server

Manage your important file and data

Why using File Server ?

- Fault tolerance for all
- Center backup for all
- Security /Access control
- Speed

In a network with many unit of computers, we don't know when one of its will out of service. If you keep important file in each computer, mean you need to do backup for all computer.

What is File Server ?

When several or many computers are networked together in a LAN situation, one computer may be utilized as a storage location for files for the group. File servers may be employed to store e-mail, financial data, word processing information or to back-up the network.
